Audit History

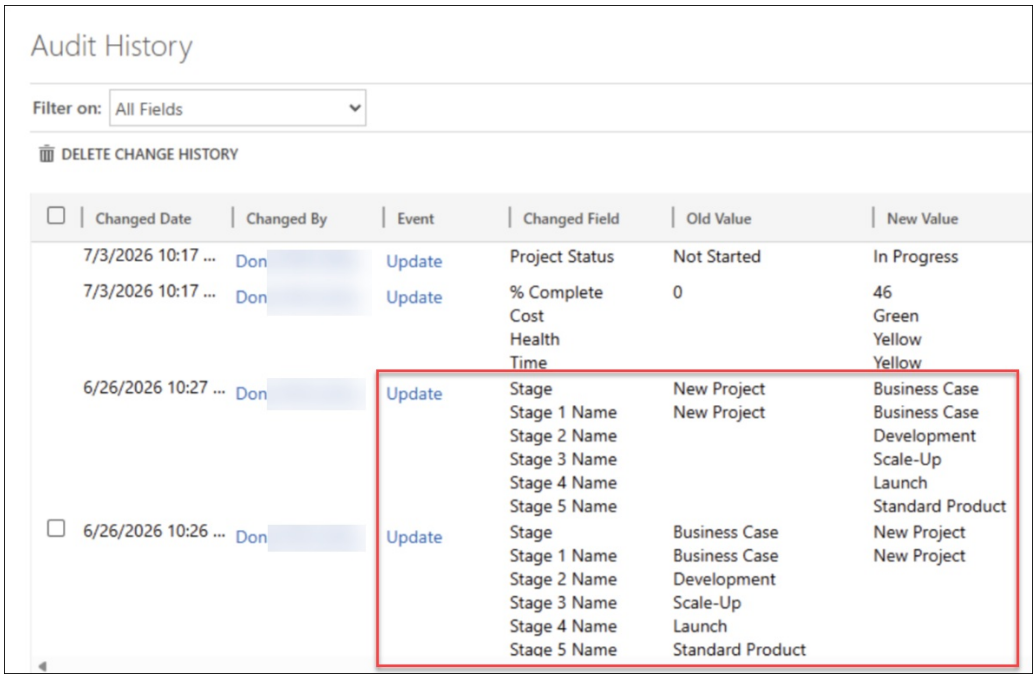

BrightWork 365 together with the Microsoft Power Platform provides organizations with the ability to track data change history and activity logging for use in analysis and reporting purposes.

To view Audit History, click the **Related** tab and choose **Audit History**.

> **Note**
>
> - onload form code will at times automatically update columns that require updating, and this activity can get logged under the interactive user's name.
> - In the "Filter on:" drop-down there are more fields listed than are actually available in the Audit History.

Project Form Changes

If you open a project that uses a different form to one you opened previously, the project's audit history will note that the Stage temporarily changed to New Project.
