

Customize Tables

Note This article is for BrightWork 365 Release February 2023 (v1.6) and newer.

Caution Be sure to first read the [Customization Notes](#) article.

Tables

Tables are where BrightWork 365 data is stored. Tables have a list of 'sub-components':

- Columns: It is safe to edit column titles. Calculated and rollup columns should not be edited. There is a large selection of different [types of columns](#) available for use in tables.
- Relationships: Do not make any edits to Relationships.
- Business Rules: See the [Business Rules](#) article for more details.
- Forms: See the [Forms](#) article for details.
- Dashboards: None supplied out of the box.
- Keys: Do not make any edits to Keys.

Caution If you delete a table, you delete both the table definition and all data that the table contains. Tables and the data within them cannot be recovered if deleted.

Create a New Table

1. In the **unmanaged solution in your dev environment** that you use for customizations:
 1. In the Power Apps solution editor click **+ New | Table**.

2. Add any required new columns to your new table.
3. Save and Publish.

For more information see this Microsoft [Tables](#) article.
