## **Customize Tables**

**Note** This article is for BrightWork 365 Release February 2023 (v1.6) and newer.

**Caution** Be sure to first read the Customization Notes article.

## **Tables**

Tables are where BrightWork 365 data is stored. Tables have a list of 'sub-components':

- Columns: It is safe to edit column titles. Calculated and rollup columns should not be edited. There is a large selection of different types of columns available for use in tables.
- Relationships: Do not make any edits to Relationships.
- Business Rules: See the Business Rules | Microsoft article for more details.
- Dashboards: None supplied out of the box.
- Keys: Do not make any edits to Keys.

**Caution** If you delete a table, you delete both the table definition and all data that the table contains. Tables and the data within them cannot be recovered if deleted.

## **Create a New Table**

- 1. In the **unmanaged solution in your dev environment** that you use for customizations:
  - 1. In the Power Apps solution editor click + New | Table.

Power Apps	♀ Search
✓ Search	$+$ New $ee   extsf{B}$ Add existing $ee   ilde{ extsf{D}}$ Da
≣ AII (8)	☐ App >
	a Automation > > Tables
🔄 Chatbots (0)	🔅 Chatbot 🖸
i≣ Choices (1)	រណ៍ Dashboard >
⊾⁄ <sup>¤</sup> Cloud flows (0)	Report
🖾 Site maps (1)	◯ Security >
∨ III Tables (6)	I Table
> Area of Service	

- 2. Add any required new columns to your new table.
- 3. Save and Publish.

For more information see this Microsoft Tables article.
