Project Management Context

To enable project Gantt schedules to accurately reflect the organization's work practices, users with the BrightWork PMO Manager or System Administrator security role have the ability to set and update global calendar settings (i.e., Working Week, Working Hours) for all projects from **Admin Area > Global Settings**.

Note

- Global Settings affects all existing open and closed projects, new projects, and all the tasks within the projects. If the settings are changed, the schedule of projects will update accordingly once they are opened, and the Gantt tab is clicked.
- Days that are not part of the Working Week will be formatted differently in the Gantt chart for easy identification.

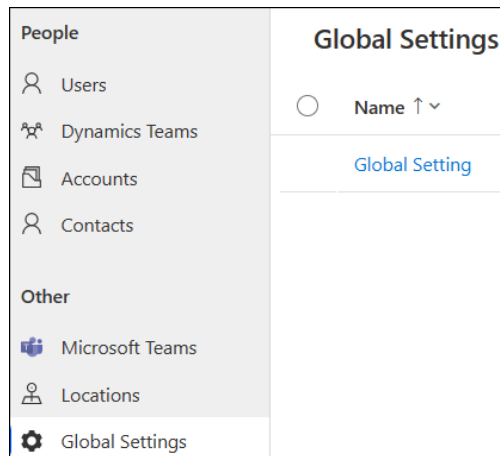

Flexible Calendaring Options

Organizations have several options available with regard to project scheduling due to the interplay between the Global Settings described in this article, global Non-Working Days, and the Schedule Settings present at the project level. Examples of the available options are:

- Leave Global Settings with the default Working Week and Working Hours configuration, set solution-wide **Non-Working Days**, and then as needed adjust **Schedule Settings > Project Override Settings** at the individual project level with a configuration that makes sense for each project.
- Implement an entirely top-down approach using organization-wide Global Settings and configured Non-Working Days to implement solution-wide settings that apply to all projects.

Configure Global Settings

Global Settings is located in the Admin Area of BrightWork 365.

Caution These settings apply to all projects and therefore should be managed with caution.

Calendar Tab

Note The default out of the box Global Settings for Working Week is Monday - Friday, and for Working Hours is Day Start 8 am, Break Start 12 pm, Break Finish 1 pm, and Day Finish 5 pm.

Working Week

To configure the solution-wide Working Week to something other than the default Monday - Friday, a user with the BrightWork PMO Manager or System Admin security role can follow these instructions:

1. Click into the **Admin Area**.
2. Click **Global Settings**.
3. Click the **Calendar** tab.
4. Click **Edit** at the bottom of the section.
5. Click the Working Week drop-down menu.
6. Use the checkbox options to include specific days as workdays.
7. Change the working hours settings as necessary (see descriptions below).
8. Click **Save** at the bottom of the section (clicking Save or Save & Close on the toolbar menu will not save these changes).

Day Start

The solution-wide hour of the day that Gantt task work starts.

Break Start

The solution-wide start hour of the day that Gantt task work is not done.

Break Finish

The solution-wide finish hour of the day that Gantt task work is not done.

Day Finish

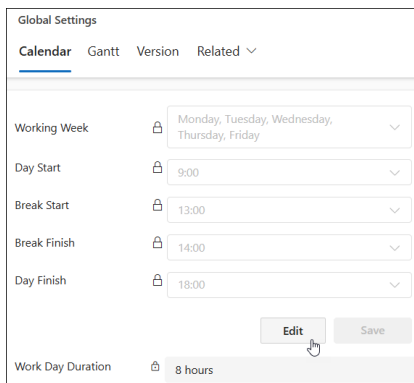

The solution-wide hour of the day that Gantt task work finishes.

Workday Duration

Automatically calculated based on the times entered in the fields above.

To configure the Global Settings Calendar:

1. Select the **Admin Area** in the BrightWork 365 app.
2. Click **Global Settings** on the main nav.
3. Click **Global Setting**.
4. Select the **Calendar** tab.
5. Click **Edit** at the bottom of the Calendar section.

The screenshot shows the 'Global Settings' interface with the 'Calendar' tab selected. The 'Working Week' is set to 'Monday, Tuesday, Wednesday, Thursday, Friday'. The 'Day Start' is 9:00, 'Break Start' is 13:00, 'Break Finish' is 14:00, and 'Day Finish' is 18:00. The 'Work Day Duration' is 8 hours. There are 'Edit' and 'Save' buttons at the bottom.

6. Select the Global Settings Working Week and working hours.
7. Click **Save**.

Configuration Tab

Gantt | Enable Virtual Scroll

Enables faster Gantt task editing. The Virtual Scroll option is intended only for very large Gantt task lists. A user with the BrightWork PMO Manager security role can enable this setting to make the Enable Virtual Scroll option available for use in every project. The default value is No. If set to No, this will not have an effect on projects that have already been configured to use the Virtual Scroll option.

Caution Virtual Scroll editing introduces issues project managers should be made aware of. For details see [Task Management](#).

BrightWork 365 Graph Client

Enabling Graph Integration allows approved applications to connect and work more effectively with your Microsoft 365 environment, leading to more integration and functionality within BrightWork 365. If this is not configured properly, the Microsoft Teams Channel and the Document Library will not be able to be set at the Project/Program/Portfolio level. Typically, this is configured during the

BrightWork 365 installation process. These settings need to be configured by a System Administrator.

Version

Displays the version number of the BrightWork 365 solution.

Audit History Tab

Displays the audit history for Global Settings.

Project Settings Tab

Select an individual project to enter its Schedule Settings screen.

You can edit the Task Scheduling Type for multiple projects in Global Settings.

Do not edit the Virtual Scroll setting for multiple projects in Global Settings; this must be enabled for each project individually.
