Project Management Context

Not having a standard way to plan and manage projects is a common challenge among project managers. This is why adopting a configurable template approach from project selection to project close is crucial for success.

BrightWork 365 ships with customizable templates to give organizations a very fast starting point. Different situations call for different levels of structure and management. The templates described in this article are part of a process spectrum ranging from light to more formally structured.

BrightWork 365 brings the best of the Microsoft 365 ecosystem together providing a single solution that allows full control over project approval and starts your projects quickly with out-of-the-box project templates.

Note BrightWork 365 comes with five starter project templates to help you get started managing projects quickly:

- The **Project Light** starter template is for managing projects that are at the low end of the

complexity spectrum for projects that require small amounts of project management.

- The **Project Standard** starter template provides a semi-structured process that is useful for a range of business departments to run their projects including sales, marketing, engineering, finance, etc. This template is in the middle of the complexity spectrum.
- The **Project Structured** starter template is for managing projects that are in the high end of the complexity spectrum.
- The **New Product Introduction** starter template relates to the submission of a new product idea and managing the delivery of the new product. This template is on the higher end of the project management process maturity scale.
- The **Product Update** starter template is typically used for projects related to updates of existing products or technologies, and for complex support issues.

Tip Decide the Project Management Process

- Your organization may have guidelines or templates for different project types, which will make this step simpler, as you will be selecting a pre-defined approach and then perhaps tailoring it.
- If you are unsure which project template would be the best fit for a particular initiative, think through how you intend to manage the project and how much project management rigor you will apply. BrightWork 365 can help alleviate any uncertainty that might remain regarding the template choice with the inclusion of the [Form Configurator](#) tool.
- With the Form Configurator you can begin with a middle-of-the-spectrum template such as Project Standard as a good compromise between using the lower project structure of the Project Light template, and the higher end of management complexity found in the Project Structured template. The different Tabs, Sections, and Columns that are hidden in Project Starter Templates can be turned on or off via the Form Configurator, giving you great flexibility with regard to project management process.

The screenshot shows the 'Project Light - Saved' interface with the 'Form Configurator' tab selected. It displays a list of sections with checkboxes to toggle them on or off. The sections and their states are as follows:

Section	Toggle State
Charter	Checked
Status	Checked
Status Reports	Unchecked
Team	Checked
Stages	Unchecked
Gantt	Checked
My Work	Checked
Documents	Checked
Actions	Unchecked
Issues	Unchecked
Risks	Unchecked
Costs	Unchecked

Form Configurator Screen

All Templates

Note

- Templates that are associated with a [Content Template](#) will be prepopulated with project data.
- User entered dates will be saved as time zone independent UTC dates, not user local dates; the same dates will be displayed for all users irrespective of time zone.
- Only the current project manager, or a user with the BrightWork PMO Manager or System Administrator security role, are considered owners of the project and can change who is listed as the project manager.

The elements below are common to all starter project templates:

Charter

Name	* Blue Yonder Solution Deployment (Pr...	Portfolio	* Contoso	Created On	11/18/2022
Project Reference	Proj-001016	Program	* Customer Success		7:55 PM
Project Manager	*  Alan Morgan (Offline)			Source Request	 Blue Yonder Solution Deployment
Project Sponsor	*  Anne Wallace (Offline)			Teams Channel	https://teams.microsoft.com/_?tenant...
				Schedule Settings	 Blue Yonder Solution Deployment (
Project Type	Other	Priority	3. Medium		
Description	Deploy the solution for Blue Yonder	Objectives	Successful solution deployment		
Exit Criteria	Iteration 1 solution successfully deployed	Overall Project Risk	Iteration 1 requirements not met within budget		
Approval Requirements	All iteration 1 specifications met	Economic Impact	Medium level		
Out of Scope	Iteration 2 requirements				

The Charter tab contains high level metadata about the project, including the project title and stakeholder information.

The following columns limit their user lookup values to the corresponding mapped BrightWork security role:

- Project Sponsor column mapped to BrightWork Team Member security role
- Project Manager column mapped to BrightWork Project Manager security role

The **Charter** tab also contains the mandatory columns **Program** and **Portfolio**. The values for these columns can later be changed in the **Project Settings** tab by a user with elevated privileges (see the **Project Settings** section below). All associated child items will be automatically adjusted to reflect these value changes.

Charter				Status	Status Reports	Team	Stages	Gantt	My Work	Documents	Action	Issues	Risks	Costs	Project Settings
Name	* JW product update 826			Create Teams Channel	<input type="radio"/> No		Send Charter and Gantt for Approval		<input type="radio"/> No						
Type	Project			Copy to New Content Template	<input type="radio"/> Yes		Move to Close Out		<input type="radio"/> No						
Template	* Product Update			Reset Target Dates in all Project Tasks	<input type="radio"/> No		Send Close Out for Approval		<input type="radio"/> No						
Reference Type	Manual			Set Health Automatically	<input type="radio"/> No										
Project Creation Method	Project Area														
Portfolio	* Contoso Projects														
Program	* Marketing														

When a Portfolio/Program value is changed, a process will run in the background to reconcile [security access](#) with these changes. When all the associated security changes have been completed and the portfolio/program move is done, an email notification will automatically be sent to the project manager and the user that initiated the change. If there is a process failure, an email notification will automatically be sent to the user that initiated the change, and the Flow owner.

The following can be specified in [Project Templates](#) and will populate corresponding columns in the **Charter** and **Project Settings** tabs of new Projects:

- Content Template
- Portfolio
- Program
- Project Manager
- Project Sponsor
- Project Type

When the back arrow is clicked while on the Charter tab, the form will reload rather than load the view or record from which you opened the project record.

Schedule Settings

 Schedule Settings	 Acme Solution Deployment
---	--

The Schedule Settings option on the Charter and Project Settings tabs provides project managers with a convenient method for viewing [global calendar settings](#) and configuring project-specific calendar settings for flexible scheduling. BrightWork Team Members can view the settings, and the project's actual Project Manager (not project managers generally), and users with the BrightWork PMO or System Admin role can edit the settings. These settings have a direct effect on the Gantt.

Calendar

Global Settings (read-only)

[Global Settings](#) are only editable in Admin Area > Global Settings, not from within a project.

- Working Week
 - To enable project schedules to accurately reflect the organization's work practices, users with the BrightWork PMO Manager or the System Admin security role have the ability to set and update the global calendar settings (i.e., Working Week) for all projects using the Admin Area > Global Settings link. The Global Settings record is created with a default working week of Monday to Friday.
 - Days that are configured to be not part of the Working Week will format differently in the Gantt chart.
- Day Start: The hour of the day that Gantt task work starts.
- Break Start: The start hour of the day that Gantt task work is not done.
- Break Finish: The finish hour of the day that Gantt task work is not done.
- Day Finish: The hour of the day that Gantt task work finishes.
- Work Day Duration: Automatically calculated based on the times entered above.

Project Override Settings

The Project Override Settings will initially populate from the Global Settings. The project's actual project manager or BrightWork PMO Manager can then change the field values for the project as required.

Note The default out of the box Global Settings for Working Week is Monday - Friday, and for Working Hours is Day Start 8 am, Break Start 12 pm, Break Finish 1 pm, and Day Finish 5 pm.

Working Week

The Working Week can be configured to something other than the default Monday - Friday.

Day Start

The solution-wide hour of the day that Gantt task work starts.

Break Start

The solution-wide start hour of the day that Gantt task work is not done.

Break Finish

The solution-wide finish hour of the day that Gantt task work is not done.

Day Finish

The solution-wide hour of the day that Gantt task work finishes.

Work Day Duration

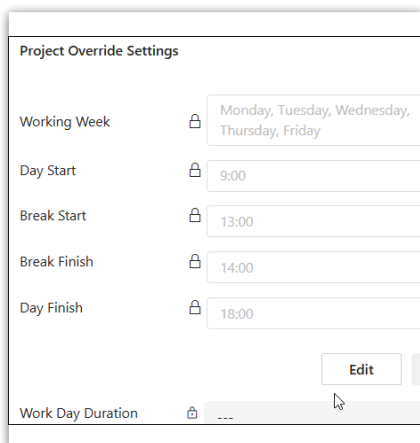

Automatically calculated based on the times entered in the fields above.

To configure Project Override Settings:

1. Go to the **Project Settings** tab within a project.
2. Click the **Schedule Settings** link.
3. Select the **Calendar** tab.
4. Check the box for Project Override Settings.

5. Click **Edit** at the bottom of the Project Override Settings section.

6. Select the project's Working Week and working hours.
7. Click **Save**.

Note After changes are made to the Project Override Settings, refresh the entire project (Ctrl-F5), and then click into the Gantt tab, in order for the changes to be reflected in the Gantt.

Project Exception Days

In the Project Exception Days tab, the project can be configured to add an extra day off or to ignore a global [Non-Working Day](#) (e.g., holiday) which was initially applied to the project from [Global Settings](#). Project Exception Days will format differently in the Gantt chart.

Project Exception Days - Views (accessed via the drop-down menu):

- Project Exception Days

- Previous Project Exception Days
- All Project Exception Days

To add new Project Exception Days:

1. Click **+ New Project Exception Days** (found in the overflow menu when not in full screen mode).
2. Fill out the Project Exception Days form.

Note

- Only a project's actual Project Manager and users with the BrightWork PMO Manager security role can edit Project Exception Days.
- Project Exception Days affects all tasks in the project, including completed tasks. We strongly recommend not adding older historical Project Exception Days because of the impact on all tasks.
- Project Exception Days do not override the Working Week set within [Global Settings](#), they only override the solution-wide configured [Non-Working Days](#) (e.g., holidays).

The Project Exception Days can be displayed in a Calendar view.

Users can set the Month display default in their Personalization Settings (BrightWork 365 app settings gear > Personalization Settings > Activities > Default view > Default Calendar).

Project Settings

- Default Access Level: See [Project Security Access](#)
- Virtual Scroll setting: See [Task Management](#)
- Default Scheduling Type: Choose between Fixed Duration, Fixed Work, and Fixed Unit as the default scheduling type for all new project tasks. See [Gantt Chart & Task Management](#) (Gantt Tabs > General > Scheduling Type).

Audit History

View a list of timestamped changes that were made to project settings.

Status

The **Status** tab allows the project manager to set current project metrics and KPIs.

See the [Project Status Reporting](#) article for more information.

Team

The **Team** tab automatically populates with the names of work item assignees, and the earliest start dates and latest finish dates across all the work assigned to them.

To manually add a team member that has not yet been automatically added from being assigned a work item, click **+ New Project Team Member**.

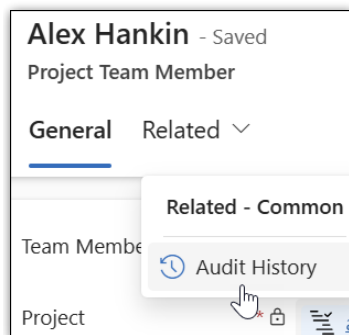

Only a project's actual Project Manager and users with the BrightWork PMO Manager

security role can add new team members to the Team tab directly.

Tip If you would like to add multiple users to the Team tab at once rather than individually, you can add a task to the Gantt, add all resources to the single task, wait for the team members to be created in the Team tab, and then delete the task. Note that the task's Start & Finish dates will be present in the Team tab for these users.

Note Also see [Project Security & Access | BrightWork 365](#) for project security related info related to project team members.

You can audit various project team member related changes, including project access security related changes, by clicking on **username > Related > Audit History**.

- Note**
- To manually delete a Project Team Member from the **Team** tab in a project, you will first need to remove the user from all work assignments in the project.
 - Dates may not update in the Teams tab until an update of some kind is made in the Gantt tab, which will trigger the date update.

Gantt

List of project tasks with a corresponding bar chart that represents the project schedule with task start and end dates. Visually depicts dependency relationships between the tasks as well as task status. See the [Task Management](#) article for more information.

Tip Users are given the option to access a French (Canada) version of Gantt through Personalization Settings > Formats tab.

My Work

To view all work assigned to you within a project, click into the project's **My Work** tab. You can enter a specific piece of work by clicking on the Name of the assignment.

Charter Status Status Reports Team Stages Gantt **My Work**

3. My Work - Open ▾

System Views

Type ▾	Assignment Sta... ▾	Due Date ▾
ge	In Progress	2/2/2023

2. My Work - All

3. My Work - Open

1. All Work

4. My Work - Completed

Note

- Deleting a work item from My Work only deletes the assignment to the resource, not the underlying work item itself.
- If a work assignment has multiple assigned users and it is marked Complete by one of the assignees, an alert will be presented asking for confirmation of the status change.
- Parent tasks will be updated accordingly when its child tasks are set to Not Started or Complete in My Work.
- If an Issue, Cost or Action has a status of Cancelled or On Hold, then the user will not be able to mark the assignment as Complete/Not Started in My Work. They will need to manually go into the assignment and change the status.
- Filtering and sorting are not available on the Complete column. Sorting is not available on any calculated columns, i.e., Due Date.

Documents

The Documents tab is where you can create new Microsoft Office documents and upload existing documents. These files are stored in a document library project folder in your organization's BrightWork 365 SharePoint site. See [Document Management](#) for details.

Caution

- By default, files deleted from the Documents tab will be permanently deleted from the SharePoint site associated with BrightWork 365 and cannot be restored from a recycle bin. Contact your Microsoft Support representative to discuss activating the associated SharePoint Recycle bin to be able to restore deleted documents.
- For customers with custom forms: SharePoint has an indexing limit that is reached when a document library contains more than 5000 items. If you receive a message about the SharePoint throttling limit being exceeded, see this [article](#).

Project Settings

Only a project's actual project manager and users with the **BrightWork PMO Manager** or **BrightWork Program Manager** security role can access the **Project Settings** tab.

The **Project Settings** tab provides additional project information and gives the manager the ability to change the portfolio or program associated with the project, reset the target dates in all project tasks (baseline the schedule), and other administrative tasks.

Microsoft Teams

Project Settings also allows the project manager options with regards to **Microsoft Teams**, e.g., they can create a Microsoft Teams Channel for the associated Microsoft Team (which is based on the project's parent program Microsoft Team setting), or they can connect to a different Microsoft Team if a Channel has not been created for the project.

Gantt	My Work	Documents	Actions	Issues	Risks	Costs	Project Settings
Reference Type		Automatic		Create Teams Channel		<input checked="" type="checkbox"/> No	
Project Creation Method		Project Area		Copy to New Content Template		<input checked="" type="checkbox"/> No	
Microsoft Team		---		Reset Target Dates in all Project Tasks		<input checked="" type="checkbox"/> No	

Note

- If the project is later moved to a different program, the project's Microsoft Team Channel will not move to the new program's Microsoft Team.
- In newer versions of Microsoft Teams, Microsoft retired the ability to load websites inside the Teams client. These website links will open in a new browser tab instead.

Send Stage for Approval

If approval is required for a stage, the approval process will need to be started manually by the Project Manager by clicking the **Send Stage for Approval** button in the **Project Settings** tab. When a stage is sent for approval, some sections of the project will be made read-only, and a related message will display on the **Charter** tab. The Business Process Flow will not be disabled, but users will be prevented from moving a stage forward or backward.

The screenshot shows the 'Project Settings' tab with several toggle switches. The 'Send Stage for Approval' toggle is highlighted with a red box. The other toggles are 'Create Teams Channel', 'Copy to New Content Template', 'Reset Target Dates in all Project Tasks', and 'Set Health Automatically', all of which are currently set to 'No'.

Changing the Project's Associated Program or Portfolio

A project's program or portfolio can be changed in the **Project Settings** tab. The list of available choices will filter to what is available based on the chosen program or portfolio.

Approval History

The Approval History section of the Project Settings tab includes a history of the approval process for each stage of the Business Process Flow.

Approval History					
<input type="checkbox"/>	Name ▾	Stage ▾	Outcome ▾	Date ↑ ▾	Comment ▾
	Alex Hankin	Initiate to Plan	Reject	1/24/2023 4:24 PM	
	Alex Hankin	Initiate to Plan	Approve	1/24/2023 4:25 PM	
	Christina Chang	Plan to Execute	Approve	1/24/2023 4:26 PM	approved by christina
	Caitriona O'Connor	Execute to Close Out	Approve	1/24/2023 4:27 PM	

Schedule Settings

The screenshot shows the 'Schedule Settings' section with a header bar containing a calendar icon, the text 'Schedule Settings', and 'Acme Solution Deployment'.

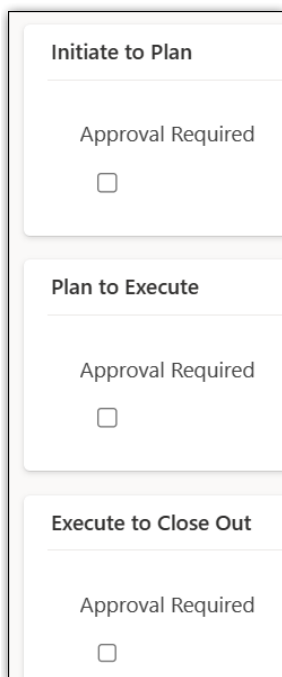

The Schedule Settings option on the Charter tab and Project Settings tab provides project managers with a convenient method for configuring project-specific calendar settings, overriding global calendar settings which will adjust the project schedule accordingly. For more information see the above [Schedule Settings](#) section.

Approvals

The Approvals tab is only visible to users given the **BrightWork Approvals Coordinator** security role.

Approvals Coordinator is a lookup and security role - the nominated user must be chosen in the **Approvals Coordinator** field and also be given the **BrightWork Approvals Coordinator** security role. The Approvals Coordinator will be notified of approval process progress.

Business Process Flow Stages are used to control the number of stages and the stage names in the Approval sections of the **Approvals** tab. The default settings are controlled by the configuration set in **Templates Area > Project Templates** by a user given the **BrightWork Template Editor** security role.

The screenshot displays a vertical list of three stages, each with a title and an 'Approval Required' checkbox:

- Initiate to Plan**
Approval Required ☐
- Plan to Execute**
Approval Required ☐
- Execute to Close Out**
Approval Required ☐

See the [Project Stage Approval Process](#) article for related information.

Issues

In the **Issues** section you can create a new issue by clicking **+ New Issue** (do not use the Add Existing Issue option).

The list of available users to choose from in the **Assigned To** column is limited to those users given the **BrightWork Team Member** security role.

Issues can be added to the project's associated program or portfolio by clicking into the issue and choosing the relevant escalation location.

Risks

In the **Risks** section you can create a new risk by clicking **+ New Risk** (do not use the Add Existing Risk option). Enter Risk information for those items identified as potential future issues, with probability, impact, status and other relevant Risk details.

The list of available users to choose from in the **Assigned To** column is limited to those users given the **BrightWork Team Member** security role.

Tip

- Risk Monitor: Person assigned overall responsibility for tracking the progress of a risk throughout its lifecycle.
- Mitigation Actions Assignee: Person responsible for taking steps to reduce the probability or impact of a risk to a project.
- Contingency Actions Assignee: Person responsible for implementing the actions required to mitigate any project impacts of a risk that has occurred.

Risks can be added to the project's associated program or portfolio by clicking into the risk and choosing the relevant escalation location.

Tip Individual Mitigation Action Assignments and Contingency Action Assignments can be marked as Completed without the overall Risk Status being set to Closed.

See [Risks](#) for additional information.

Costs

The Costs tab provides a comprehensive method for capturing and tracking project budgets and actual costs at the project and individual item levels. See the [Costs](#) article for details.

Communications

Initiate and save project related Emails and Appointments directly in the BrightWork 365 app and save these items as well as Phone Call details and Notes, within associated projects. See the [Communications](#) article for details.

Group Manager Field

The list of users returned in the **Group Manager** drop-down field that is in the **Charter** tab of Product Update projects is limited to the users added to the **Senior Managers** Dynamics Team found in **Admin Area | Dynamics Teams**.

Location Field

The **Location** drop-down menu choices that are found in the Charter tab of the Product Update template are configured in **Admin Area | Locations**.

Status

See the [Project Status Reporting](#) article for more information.

Status Reports

The **Status Reports** tab provides the project manager with the ability to create snapshot status reports of the project's current standing and to view a history of status reports. See [Status Reporting](#) for details.

Stages

- Stages are automatically listed in the Stages tab after being created in the Gantt tab (a Gantt task can be set to be a Stage type task in Task Details). Manually adding stages from within the Stages section is not supported.

- The default sorting for the Stages list is by Current Start - Older to Newer.
- In the **Stages** section, the **Current Stage** column will match the current stage set in the Business Process Flow if the names of the stages in the Gantt match exactly with those in the Business Process Flow at the top of the project.

Actions

Log project actions, decisions, and changes. See the [Actions](#) article for details.

Issues

In the **Issues** section you can create a new issue by clicking **+ New Issue** (do not use the Add Existing Issue option).

The list of available users to choose from in the **Assigned To** column is limited to those users given the **BrightWork Team Member** security role.

Issues can be added to the project's associated program or portfolio by clicking into the issue and choosing the relevant escalation location.

The screenshot shows a web form for an issue titled "Delay in onboarding suppliers". At the top, there are tabs for "Issue Status" (set to "Not Started"), "Project" (set to "Powdered Cream Cheese for Africa"), and "Program" (set to "Product Operations"). Below these is a section titled "Issue" with a sub-section "Reference". The "Reference" section contains several fields: "Name" (with a red asterisk and the text "Delay in onboarding suppliers"), "Issue Reference" (IS-001181), "Portfolio" (Contoso Projects), "Program" (Product Operations), and "Project" (Powdered Cream Cheese for Africa). At the bottom of the "Reference" section is an "Escalation" field, which is highlighted with a red box. A dropdown menu is open for the "Escalation" field, showing the following options: "--Select--", "Project", "Program" (which is highlighted), and "Portfolio".

Risks

In the **Risks** section you can create a new risk by clicking **+ New Risk** (do not use the Add Existing Risk option). Enter Risk information for those items identified as potential future issues, with probability, impact, status and other relevant Risk details.

The list of available users to choose from in the **Assigned To** column is limited to those users given the **BrightWork Team Member** security role.

Tip

- Risk Monitor: Person assigned overall responsibility for tracking the progress of a risk throughout its lifecycle.
- Mitigation Actions Assignee: Person responsible for taking steps to reduce the probability or impact of a risk to a project.
- Contingency Actions Assignee: Person responsible for implementing the actions required to mitigate any project impacts of a risk that has occurred.

Risks can be added to the project's associated program or portfolio by clicking into the risk and choosing the relevant escalation location.
